EXPERIENCE

MARKS	Tick a skill the moment you roll a dragon or a demon with it. The box holds one mark however many you roll.
At the end of the session, place two more marks on any unmarked skills you choose. You do not have to justify them.	
ROLLS	Roll D20 for each mark. If the result EXCEEDS that skill's current level, raise it by one, to a maximum of 18. Then erase every mark and start again next session.
PERKS	Raising a skill to 18 earns you a perk of your choice.
TEACHER	A shift of training with a teacher at 15 or higher, above your own level, gives one extra roll immediately. A teacher can only raise a skill by one.
SORCERY	A school you already know improves like any skill. A new spell costs one mark for that school instead of the roll.

BASE CHANCE

Base chance applies to every skill of that Color. Trained skills start at twice base.

COLOR SCORE	BASE
1–5	3
6–8	4
9–12	5
13–15	6
16–18	7

ARMOR

ARMOR	SLASH	PIERCE	BLUNT	BANE ON
Leather	1	1	3	—
Studded Leather	2	2	4	<i>Sneaking</i>
Chainmail	6	4	4	<i>Evade, Sneaking</i>
Plate Armor	6	6	5	<i>Acrobatics, Evade, Sneaking</i>
Open Helmet	+1	+1	+1	<i>Awareness</i>
Great Helm	+2	+2	+2	<i>Awareness, ranged attacks</i>

Chainmail and plate also give a bane on SWIMMING.

Metal armor prevents sorcery outright — see Casting a Spell.

Putting armor or a helmet on or off costs an action.

PUSHING A ROLL

Fail a skill or Color roll and you may push it: roll again and take the new result, whatever it is. You can never push a demon.

COST	Immediately take a condition of your choice. You cannot take one you already have, and you must be able to say how the action caused it.
EFFECT	A condition gives a bane on every skill based on its Color, and on rolls against that Color.

CONDITIONS

☹ Sickly	<i>bane on White skills</i>
💢 Angry	<i>bane on Blue skills</i>
😱 Scared	<i>bane on Black skills</i>
🥴 Dazed	<i>bane on Red skills</i>
😫 Exhausted	<i>bane on Green skills</i>

AT ZERO HP

DEATH ROLL	Each round, roll against your White. It cannot be pushed. Three successes and you recover D6 HP; three failures and you die. A dragon counts as two successes, a demon as two failures, and more damage at zero HP is an automatic failure.
RALLY	An ally within 10 metres can INSPIRE you to keep acting — you still make death rolls. Rallying yourself is a Black roll with a bane.
SAVING	An adjacent ally can spend an action on a HEALING roll, with a bane if they have no bandages. Success stops the death rolls and restores D6 HP.

THE ROUND

INITIATIVE	Everyone rolls D20 and adds their movement bonus. Highest acts first. Rolled once per encounter, not per round. A tie goes to the higher Red.
YOUR TURN	Move up to your movement rate and take one action, in either order — you may even split the move around it. Nothing keeps for a later round.
FREE	Drawing a weapon already at hand, dropping prone, getting up, a shouted word or two. One of each kind, on your own turn only.
WAITING	You may swap turns with anyone later in the order. They cannot refuse, and the swap lasts the round.

ATTACKING

Roll the weapon's skill. Melee reaches 2 metres, 4 with a long weapon.

DAMAGE	Roll the weapon's dice and add your damage bonus — Green for melee and thrown, Red for bows, slings and cannons, Green for unarmed. Armor subtracts from the rest.
DRAGON	A critical hit: it takes a dragon to parry or dodge it, and you choose one effect — double the weapon's damage dice before bonuses, or a free second attack on another enemy, or armor ignored if the damage is piercing.
DEMON	You miss and cannot push. Roll on the mishap table.
TYPES	Slashing, piercing, bludgeoning. If a weapon does more than one, say which before you roll.

PARRYING & DODGING

Both are reactions: declare before damage is rolled, and never both against one attack. Either spends your whole turn and your movement, so neither works once your turn has passed. Both work while prone.

PARRY	Roll the skill of the weapon in your hand. Never unarmed, you cannot draw a weapon in order to parry, and monster attacks usually cannot be parried at all.
BREAKING	Damage above the weapon's durability breaks it until a CRAFTING roll repairs it. Piercing never breaks a parrying weapon.
SHIELD	No skill for shields. Parry with any Green melee skill — anything except Knives and Staves.
DODGE	Roll EVADE. No damage on success, and you may step 2 metres without triggering a free attack. Monster attacks usually can be dodged.
DRAGON	A dragon while parrying is an immediate free counterattack that cannot be dodged or parried.
FAILURE	You take the damage, but gain a boon on your next attack against that same enemy.

CASTING A SPELL

Roll your skill in the school. Any school can cast a general spell. On a failure nothing happens; you may push.

COST	2 WP per power level, and the level is 1 to 3. A spell with no power level costs 2. Tricks cost 1 WP and always work.
DEMON	No push, and a risk of a magical mishap.
METAL	No sorcery in metal armor or with metal to hand — axes, spears, studded leather, arrows. Staves, clubs and slings are fine; stowed metal does not count.
NEEDS	Word, gesture, focus, ingredient or symbol. You need every one the spell lists.
TIMING	An action unless stated otherwise. Reaction spells do not spend your turn, so cast as many as you can pay for. From an unprepared grimoire, twice as long.
BODY	At 1 or 0 WP you may roll any die for that many WP and take the same number as damage. Never for a healing spell.

REST & HEALING

ROUND	One round. Recover D6 WP, no HP. Once per shift.
STRETCH	One stretch. Heal D6 HP — 2D6 if someone tends you and makes a HEALING roll — plus D6 WP and one condition of your choice. Once per shift.
SHIFT	One shift, somewhere safe. All HP, all WP, all conditions. Interrupted by combat or hard work, it does nothing.
